

cybercrimeawareness training

Protecting you and your business

Cybercrime is a very real and common threat. It's not just something that 'happens to other people' and you need to know how to **recognise it** and **protect yourself** against it.

Join projectfive for a **Cyber-Crime Awareness Training Course**, which will help you and your team recognise these threats and take practical measures towards making yourself – and your business – less vulnerable.

Course outline

- ✓ What is Cybercrime?
- ✓ Types of Cybercrime
- ✓ Antivirus - *How it works*
- ✓ Firewalls - *How do they work?*
- ✓ Windows Updates
- ✓ Passwords - *Best practice*
- ✓ Security Questions - *Always lie!*
- ✓ When you've been compromised

“ *The seminar was practical and informative with real-life examples, that made it easy for our staff to understand the importance of cybercrime awareness. It certainly opened our eyes and made us much more vigilant. I would highly recommend this training for your employees.* ”
